

A PITCH from my brain

Are you lying to your brain, telling it money matters?

Are you overleveraged? Did you put too many eggs in one basket?
Have you unlocked **new fears in life?**

Have you ensured **your DNA moves forward in the universe?**

There are **too many questions and too few answers.**
Is it **supposed to be this way?**

How can my children **dream and create** when the system limits them?

How do WE make our DNA and our creations dream again?

How do we raise **Doctors, Firefighters, Nurses, Lawyers, Scientists, Politicians—**
as much as we raise **the next viral influencer?**

How do WE ensure our ancestral DNA stays with the future?

I am working on something that I hope will **surpass all known inventions.**

Something that will **fulfill the dreams of my ancestors,**
and **give my children the freedom to be kids in a chaotic world.**

Something that will **enable guardians and parents to just be that.**

This is bigger than a product. Bigger than a company. This is about ensuring we move forward.

We are building the first thing for the **UNKNOWN** coming **quantum leap ecosystem**

$$\text{Trust} = f \left((\text{Quantum} + \text{Cloud} + \text{Crypto})^{\text{Computers} \times \text{AI}} \times \frac{\text{Human Will} + \text{Chaos} + \text{Craziness}}{\text{Entropy}} \times \text{Legacy} \right)$$

We need \$100,000 to finish our prototype and hire a fractional CFO to make spreadsheets and tell you how much we wasted and how much funding my children will need in their future ventures, and their children.
